Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This group of three two-bay-wide, two-story brick houses with low-pitched gable roofs are typical of the small alley houses built in Baltimore in the 1850s and 1860s, often along especially narrow secondary alley streets running perpendicularly off the main "alley" street like this block of Duker Street, which runs off the 500 block of South Bradford St. In many cases, alley houses such as these are still occupied by working class families and many are still covered with the formstone put on in the 1950s or 1960s.

The houses are two stories in height, 16' wide, and occupy lots 56'6" deep. Each house is only two rooms deep. The pitch of the gable roof is especially low, a characteristic of this particular type of two-story, gable-roofed alley house. The houses are probably constructed in common bond, but all of the facades are now covered with formstone. Originally each house had a simple brick corbelled cornice, but all are now obscured by the formstone. Chimneys are located at the rear of the house.

The original door and window openings have been completely obscured by the stucco and formstone coverings and all windows are filled with replacement 1/1 sash. No original doors survive and the row shows a mix of replacement door styles, all surmounted by a single light transom. The houses have no basements, the entrances being reached directly from the street. 2305-2307 have an arched sallyport which provides a service entrance to the rear yards of the back-to-back lots with the houses to the south on Fleet St. 2303 has its own sallyport as part of the house.

The houses are basically two rooms deep, with the front room being entered directly from the front door. The front and back rooms of the first floor are separated by a wide opening, with the tightly winding, narrow stairs set in the rear room, in the space between the partition wall and the fireplace.

Specific dates c. 1868

Builder/Architect John W. Randolph and George W. Donohue

Prepare both a summary paragraph of significance and a general statement of history and support.

These houses are significant as being representative of a surviving group of extremely modest two-story, gable-roofed houses built in Fells Point in the 1850s and 1860s to serve as inexpensive housing for the influx of newly arrived immigrant families seeking work in harbor-related activities or in the first small factories being built at this time. Most of these houses were located along narrow alley streets, or, as is the case here, along even narrower courts. In terms of design, the houses are basically the descendants of earlier Federal-style working class housing built in the early decades of the century, but without the usual dormer story of such houses. Because there is no dormer story the roof slope is much less steep in these later versions of the style. The houses are quite tiny, with two small rooms on each floor and a centrally located, tightly winding, narrow staircase.

The houses were built by John W. Randolph and George W. Donohue, who also built all of the other houses in this block, according to a pattern that was quite common to the city's working class neighborhoods of the period 1870 to 1910. Recognizing that workers held different levels of jobs (and pay), builders created a hierarchy of house sizes (and prices) in the new neighborhoods going up to serve the expanding factory districts ringing the harbor and northeast of the central city. Builders acquired anywhere from an eighth to a half of a city block and built 14' to 15'-wide two-story houses on the main streets, and smaller, 11' to 13'-wide two-story houses on the narrower streets bisecting the blocks. Typically, in this period, main street houses might sell for \$1,200 to \$1,500; small street houses for \$700 - \$900. These old-fashioned gable-roofed houses were the most modest built in the block.

The land originally belonged to the Patterson family as part of their 18th century estate, which also included the land given by the family to the city for Patterson Park. In the late 1860s the Patterson heirs began developing this block by leasing parcels to Randolph and Donohue, who built more stylish two-story houses on the other streets of the block. They sold most of the houses to mainly German-American semi-skilled tradesmen and laborers employed in nearby factories, who received mortgages from a variety of local building and loans, many of them sponsored by the German community. These houses on Duker Ct. also sold to German-American owner-occupants.
